Sharaqpur, Pakistan

A passionate and self-driven MERN stack developer pursuing a Bachelor's in Information Technology. Dedicated to building responsive and user-friendly web applications using modern technologies. Strong problem-solving skills with a commitment to continuous learning and teamwork.

Education

University of the Punjab   Nov 2023 - Dec 2027

Bachelor's of Information Technology (cont.)

Experience

Project-based experience   Sep 2024 – present

- Built multiple scalable and responsive web applications using *Node.js*, *React.js*, *Tailwind CSS*, and *vanilla JavaScript*.
- Strong skills in *component-based architecture*, *state management*, and *real-world logic* through hands-on projects like a task manager, to-do app, e-commerce store, and restaurant UI.
- Collaborated with GitHub for **version control** and practiced code reusability and modular design.

Projects

- **Task Management System**
  Developed a scalable web application using React.js and LocalStorage to optimize task management operations. Enhanced user experience for both admin and employees.
- **Portfolio Website**
  Personal portfolio website. Build in react JS, tailwind CSS. Showcasing all my projects. Sleek responsive design.
- **TodoApp – Using Local Storage**
  A React application utilizing the Context API and LocalStorage to manage a to-do list. Includes functionality to add, update, delete, and toggle item completion.
- **E-commerce Store**
  A fully functional React-based e-commerce store using Redux for state management. Allows users to search, manage cart, and place orders. Styled with Tailwind CSS.
- **Restaurant Site**
  Created a slick and responsive restaurant UI using vanilla HTML, CSS, and JavaScript.

Skills

HTML5, CSS, SCSS, JavaScript, React.js, Node.js, ExpressJS, MongoDB, MySQL, Tailwind CSS, Bootstrap, Frammer Motion, GSAP, C++, Object Oriented Programming, DSA, Communication, Problem Solving.
