+92 328 4169020
Sharaqpur, Punjab, Pakistan

A motivated Bachelor's in IT student proficient in the MERN Stack, focused on building responsive, user-centric web applications. Demonstrates strong problem-solving skills through hands-on project development, with experience in modern frontend and backend technologies, component-based architecture, and state management. Eager to contribute to a dynamic development team.

Education

University of the Punjab   Nov 2023 - Dec 2027
Bachelor's of Information Technology (cont.)

Technical Skills

- **Frontend**: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstarp, Motion, GSAP
- **Backend**: Node.js, Express.js, REST API
- **Database**: MongoDB, MySQL
- **Tools & Methods**: Git, GitHub, LocalStorage, Responsive Web Design, Component-based Architecture
- **Soft Skills**: Problem-solving, Team Collaboration, Fast Adoptability, Continuous Learning

Experience

Self-Directed Full-Stack Developer   Sep 2023 – present

- Lead the end-to-end development of full-stack applications from concept to deployment, including the Task Management System with RBAC.
- Contributed in an ecommerce platform **Zayrah** with Stripe payment integration
- Employ modern development workflows: Git/GitHub for version control, modular component design, and writing clean, maintainable code with documentation.

Projects

Full-Stack Task Management System | (MongoDB, Express.js, React.js, Tailwind CSS, JWT)

- Engineered a secure, full-stack productivity platform with **Role-Based Access Control (RBC),** differentiating Admin and Employee dashboards.
- Core features include Admin creates/manages users & assign tasks; Employees update task status & view assignments.
- Secure API endpoints with JWT authentication and managed application state efficiently for a seamless user experience.

Job Listing Application | (REST API, React.js, Tailwind CSS, MongoDB, Express.js)

- Built a full-stack job board where users can Create, Read, Update and Delete (CRUD) job listings via a responsive React frontend.
- Designed a clean RESTful API with Express.js to handle all job operations, connected to a MongoDB database for persistent storage.

Personal Portfolio | (React.js, Tailwind CSS, CSS3, Motion)

- Built a modern, performant portfolio site to showcase technical projects and skills with a focus on design and usability
- React Router is used for quick navigation between different sections.

Weather App | (React.js, CSS3, API integration)

- Created a weather application using third party API in react.js , provides location based weather details.
